

Two days of real world CorelDRAW training for the laser owner.

This is the ultimate hands on class for CorelDRAW and the laser owner. It's held in our facility in beautiful downtown Arlington, Texas. Wear comfortable clothing and shoes, and we'll provide the rest - even the gloves.

First, we'll make sure you understand the basic time saving functions in CorelDRAW. Next come the layouts that will make your work more attractive; artwork, logos, ornamentals, and selecting the right font for the laser. A 190 page manual is provided for each class member. What we cover in the class is in the manual. Take it home and practice!

REGISTRATION
