

Note: The Scale with image option can be different for each object.

In the 'Texas' logo below, the font is AndrewScript. To create the desired effect, a line width of .15 was used. Remember that the default line width of text is NONE. You can create bolder text effects by changing the line width.

TEXAS

Now the large Texas were scaled down 35% of the original.

With the Scale with image turn on, the line width changed proportionally.

With the Scale with image option turned off, the line width remained at .15”.
