

# SERIES 3 CONTROLLER

## SERIES 3

### NEW HIGH SPEED VISION CONTROLLER

Introducing the new Series 3 Controller. With engraving speeds of up to 10 inches per second, it will increase your productivity significantly! The controller has many other new state of the art features including a high speed network connection to the PC, job timers, multiple programmable

offsets, advanced diagnostics and the ability to run saved jobs directly from the hard drive on the local computer, or from any location when connected to a network. An optional pendant is also available. This Series 3 controller is fully 3D capable and runs from most industry standard programs such as CorelDRAW®, Vision®, Vision Pro®, SignLAB®, EngraveLAB®, Casmate®, Enroute®, Type3® and more! Included with the Phoenix 1212 and larger Vision systems, this new controller is retrofittable to most other manufacturers' engraving tables.
