Tips

Ordering TroLase ADA Signage with self-adhesive film applied to the back will allow you to easily mount letters cut-out from the material plate onto base plates or walls. During assembly, use the cut material plate as a template for spacing and as a line level.

A few tips for best results:

- A cutting grate should always be used when cutting plastics, in order to lift the material.
- Remove the protective film in order to prevent discoloration or excessive smoke.
- If excess smoke results, then too much energy is being used. In this case increase the speed.

TroGlass Series

Our TroGlass acrylic series is available in an extensive assortment of colors, in variations of transparent, fluorescent, translucent and non-transparent, as well as different surface structures. Each product in the TroGlass portfolio comes standard with a plastic laserable mask. This unique feature protects the acrylic from scratching, which reduces scrap and rework, and improves processing results. TroGlass products also offer excellent light transmission and light diffusing properties, making it an ideal choice for illuminated signs.

Wood

Trotec wood products are selected for laser engraving, laser cutting, mechanical engraving and mechanical cutting. Both the natural wood as well as the MDF and Plywood alternatives allow for fine detail marking and cutting with a laser. Create your outstanding signage with the natural characteristics of real wood. Trotec wood offers a high variation of looks and results when laser engraving, depending on laser settings - deep engraving, dark black marking, light surface marking.

Please consider: Wood is a natural product, so please review our deviations and tips for storage located on our website.

Tips

TroWood Solid Wood sheets are composed of individual strips of wood. Variations in color and grain will occur.

We recommend that you allow time for the wood to acclimatize to its new environment before processing. Ideally, maintain in an area with constant temperature/humidity.

The ideal material for each application

The Trotec Materials business unit was launched in October 1996. Today our broad line of materials includes more than 800 products designed for laser and rotary processing — including laminates, acrylic sheets, wood panels, and laserable paper. Materials are available in a wide selection of colors and surface finishes, and are used for many applications such as indoor and outdoor signage, illuminated displays, ADA signage, print-and-cut applications, name plates, data tags, plaques and more.

Combined with our extensive line of CO_2 and fiber laser systems, our materials product line has enabled us to provide you with a complete range of support for your business – including laser equipment, materials and expertise – in a convenient and unique single-source solution. Our materials provide high-quality results in fewer passes and leave less residue. Other major benefits include:

– Lowest cost on premium products
– In-house technical support for lasers and materials
– Fast delivery
– Easy online purchasing

You can quickly and easily purchase our high-quality laser and engraving materials online at our webshop at www.engraving-supplies.com. On our webshop, you will find a comprehensive assortment of products, up-to-date information about our materials, usage and processing tips, and practical sample instructions.
